• Automatic thread wiping device

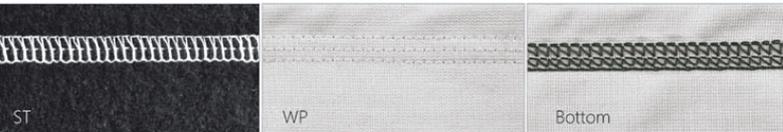

• Hidden outer thread cam

• Automatic foot lifter device

• Direct drive system

GK501/GK601 series machine produce stitch 605 by three straight needles, one looper, one spreader and needle bar thread taking-up. The key parts are made of fine quantity or fine quality aluminium alloy. Needle bearings and trimming belts are used in key driving positions. It has many outstanding features such as easy adjustment of bottom differential feeding, easy knob type stitch regulation and easy threading. The machine can offer wider usage which covers lap seaming, covering seaming and decorative seaming for underwear, sportswears, T-shirts, knitting fashion, etc.
